BIRD'S-EYE VIEW OF THE FAMOUS SOO LOCKS, SAULT STE. MARIE, MICH.

97983

The old portage around the St. Marys Falls has given way to a ship canal and four great locks on the American side, and one lock on the Canadian side of the river.

More than 80 million tons of freight passed through the American locks during the eight months of navigation in 1923. This is a greater volume than all the ocean ports of the U. S. enjoy in a year, and over ten times the yearly tonnage of the Panama Canal. The locks are the city's chief attraction and are visited by thousands of interested tourists yearly.

PUBLISHED EXCLUSIVELY FOR A. E. YOUNG, SAULT STE. MARIE, MICH.
